WORK EXPERIENCE

Tata Consultancy Services **Kochi, India**
Systems Engineer February 2021 - April 2023

- Enhanced existing functionalities of an e-commerce pharmacy platform by implementing new business logic, improving backend performance and code efficiency using Java and Spring Boot.
- Optimized MySQL database queries and implemented efficient indexing strategies.
- Implemented unit tests using JUnit and Mockito, increasing test coverage to 80 percentage to meet the standards.
- Resolved production issues by debugging and implementing efficient code fixes.
- Worked on Business Rules, Export configurations, Workflows, and Web UI in STIBO Systems.
- Participated in Agile procedures including daily stand-ups and sprint planning, ensuring timely delivery of project milestones.

PROJECTS

Analysis of Bias in Collaborative Filtering Recommender Systems

- Preprocessed and analyzed a large dataset to identify disparities in predictions based on user demographics.
- Implemented and fine-tuned various recommendation algorithms, including Matrix Factorization (PMF, BiasedMF) and k-Nearest Neighbors (kNN).
- Evaluated model performance using metrics such as Mean Absolute Error (MAE) and conducted experiments on balanced vs. imbalanced datasets.
- Reproduced experiments from a published study to validate findings related to demographic biases (age and gender) in recommendations.

  Technologies Used: Python, Java, CF4J library, Data Preprocessing, Machine Learning Algorithms, Statistical Analysis, MS Excel, Pandas

Movie Review Submission Backend Application

- Designed and implemented RESTful API -s using Spring Boot for creating, retrieving, and managing movie reviews.
- Utilized MongoDB as the NoSQL database for storing review data, ensuring flexible schema design.
- Integrated basic CRUD operations for review submission and retrieval.
- Handled data persistence and interaction between the service layer and the database using Spring Data MongoDB.

  Technologies Used: Java, Spring Boot, MongoDB, Postman, Git.

SKILLS

Backend : Java, Python, R
Frontend : React, Java Script, HTML, CSS
Framework : SpringBoot, Flask
Databases : SQL, MySQL, MongoDB
Testing : Postman
Tools : PowerBI, Tableau, Git, Jira, Agile, Scrum, VS Code, MS Office

EDUCATION

University of Koblenz April 2023 - Current
MSc Web and Data Science CGPA : 2,21

Government Engineering College Idukki July 2015 - May 2020
Bachelor of Technology in Information Technology CGPA : 7.88/10

LANGUAGES

- English : C1 Level
- German : A1 Level
